👤 PROFILE

Metering & Data Analytics professional with 3+ years of experience bridging field operations and advanced analytics. Proven track record in tamper detection, anomaly analysis, and CRM/MRBD optimization, with hands-on expertise in energy meter testing, modem configuration, and CMRI data handling.

Certified in Google Data Analytics, with strong command of SQL, R, Tableau, Power BI, Excel, and Python. Designed dashboards and scalable pipelines that improved reporting efficiency by ~30% and reduced operational losses.

Currently pursuing MCA, with a passion for transforming raw data into actionable insights that drive operational excellence and customer satisfaction. Seeking Data Analyst roles that leverage both technical depth and domain expertise.

📁 PROFESSIONAL EXPERIENCE

Meter Tester

Bikaner Electricity Supply Limited (EPCPL & TNSL)

09/2021 – Present | Bikaner, Rajasthan, India

- Detected tampering and electrical theft, contributing to significant reduction in metering losses.
- Conducted anomaly detection using CMRI and CRM data, improving fault identification accuracy.
- Installed and tested energy meters both on-site and in lab environments & also used instruments Zera, Accuchek, and Megger for testing.
- Built Excel-based dashboards that improved reporting efficiency by ~30%.
- Handled modem configuration and CMRI data extraction for consumption analysis.
- Managed meter reconciliation and CRM/MRBD operations across multiple consumer segments.
- Collaborated with cross-functional teams to streamline field operations and budget tracking.

Data Analytics Trainee

MedTourEasy

07/2025 – 07/2025 | Remote

- Completed a 4-week industrial training with mentorship support.
- Developed a project titled Death Age Difference Analysis of Right vs. Left Handers using R and Tableau.
- Contributed to the development of a predictive analytics model that enhanced forecasting accuracy.
- Applied statistical modeling and data visualization to uncover health risk patterns.
- Gained hands-on experience with SQL, spreadsheets, and presentation tools.
- Received Certificate of Completion, Letter of Recommendation, and Letter of Appreciation.

📁 PROJECTS

E-Commerce Sales Analysis – Power BI, Python, DAX, Excel

- Identified top products and customer segments, supporting targeted marketing strategies.
- Built interactive dashboards to track KPIs, revenue trends, and seasonal peaks.

Marketing Campaign Dashboard – Power BI, Python, DAX, Excel

- Designed ROI, CTR, and CPC dashboards with geo-based performance insights.
- Helped optimize campaign spend and improve conversion rates.

Customer Segmentation (RFM + Clustering) – Power BI, DAX, Python (sklearn), Excel

- Applied clustering techniques to classify customers into Super VIPs, loyal, and churn-risk groups.
- Delivered actionable insights for retention and upselling strategies.

Meter Anomaly Detection – Excel, Meter Data, CRM Data

- Detected tampering and faulty meters, reducing operational losses.
- Automated reconciliation workflows to improve accuracy and efficiency.

Big Data Pipeline Prototype – Google Sheets, Meter Data, CRM Data

- Designed scalable pipelines capable of handling 50K+ rows of meter data.
- Enabled anomaly detection and consumption analysis at scale.

Healthcare Risk Analysis (Death Age Difference Study) – R, Tableau

- Conducted statistical modeling comparing right-handed vs. left-handed populations.
- Visualized findings in Tableau, earning recognition during internship.

EDUCATION

Master of Computer Applications (MCA)

Sikkim Manipal University (Online)

03/2025 – Present | Online

Bachelor of Computer Applications (BCA)

Shri Jain P.G. College, MGSU

08/2021 – 05/2024 | Bikaner

Senior Secondary Education

Govt. Sadul Sr. Sec. School

07/2020 – 07/2021 | Bikaner

KEY ACHIEVEMENTS

Reduced metering losses

Detected tampering and anomalies in energy meters, contributing to significant reduction in operational losses.

Improved reporting efficiency

Designed Excel dashboards and reconciliation workflows that cut reporting turnaround time by ~30%.

Built scalable data pipelines

Developed prototype pipelines handling 50K+ rows for anomaly detection and consumption analysis.

Enhanced CRM/MRBD operations

Streamlined CRM data handling and meter reconciliation across multiple consumer segments.

Delivered impactful analytics project

Completed R-based statistical modeling and Tableau visualizations during MedTourEasy internship, earning LOR and appreciation.

SKILLS

Data Analytics & Visualization

Power BI, Tableau, SQL, Excel, R, Python, DAX, Dashboard Creation, KPI tracking, Anomaly Detection, Data Cleaning

Programming & Scripting

Python, SQL, R

Metering System & Tools

M-Cube, MACS ELEVEN, VIN PLUSE, Genus, Urja Meter, CRM Handling, MRBD and Testing with instruments like Zera, Accucheck & Megger.

CERTIFICATES

Google Data Analytics Professional Certificate — Coursera

- Gained practical skills in **Data Cleaning, Visualization, SQL, R Programming, and Problem Solving**
- Applied analytics to real-world case studies, supporting **data-driven decision making**
- Earned **Certificate of Completion, Letter of Recommendation, and Letter of Appreciation**
